

World Patient Safety Day on 17/9/2020

Safe medical care for everyone

Patient empowerment:

Empowering patients to understand and implement important measures such as hand hygiene, so that they contribute to safety and do not neglect their health due to the COVID-19 pandemic

Employee safety is patient safety:

Paying attention to stress levels of employees in order to strengthen their resilience and maintain the performance of the healthcare system

United against germs

HARTMANN's mission: Supporting medical employees and caregivers with comprehensive solutions in their joint fight against infections

Right now: Everyone vs. SARS-CoV-2

Containing outbreaks with **KOW**
(Keep your distance + Observe hygiene + Wear a mask)

Research for
infection protection
