

HARTMANN

13.09.2021: 10 years World Sepsis Day

SEPSIS

Every year 75,000 people* die from sepsis in Germany

Sepsis is a life-threatening emergency, and the number one cause of death from infections worldwide. Typical symptoms of **SEPSIS**** are:

Slurred speech
Confusion

Extrême tremor/
Muscle pain/fever

Severe dys**P**noea

Urinary di**S**orders

Intense feeling of illness

Patchy or discoloured **S**kin

prevent infections – prevent sepsis – save lives

A large percentage of sepsis cases and associated deaths could be prevented by taking suitable preventive measures.

Vaccinations

Hand hygiene

Safe birth

Clean water

Research for
infection protection
