

CLEAN HOSPITALS

– What is it all about?

CLEAN HOSPITALS pursues a holistic approach in which, in addition to hand hygiene as a key element, all components associated with hygiene in the healthcare system are taken into account.

In particular focus: the immense importance of environmental hygiene in the context of the prevention of healthcare-acquired infections (HAI) and patient safety

Together for a healthy future

The initiative's goals:

- Creating a global environmental hygiene network, thus connecting international stakeholders, academia, governmental bodies, NGO's, hospitals and industry experts
- Making hospitals safer through improved environmental hygiene
- Benefiting public health by lowering rates of healthcare-associated infections
- Reducing antimicrobial resistance
- Protecting patients and healthcare workers
